

Part III in C Viola Clef

Dominic Murcott

MT Modulation

## Programme Note

Maureen Tucker's drumming with the Velvet Underground reduced the groove to the most basic stream of pulses. Unchanging and direct it was the perfect foundation for the band's sonic adventures. Starting with the same idea, MT Modulation is a stream of 912 quavers at 130 beats per minute with no other note values and no gaps. It uses only whole tone scales, chromatic scales and notes chosen randomly by the players.

Commissioned by CoMA (Contemporary Music for All), July 2013.

## Performance notes

The group should be arranged with the percussionist as a central feature. The conductor should let the group play as independently as possible, helping with cues and maintaining time where needed.

Two notes on the same staff to be played divisi.
